New Build, Rehabilitation, Service & Maintenance

Power Plants

- Fuel supply systems / multi fuel firing
- Steam generator & components
- Steam turbines & other rotating equipment
- High, medium & low pressure steam pipe systems
- Heat recovery steam generators
- Waste heat recovery systems
- Instrument & control systems
- Emission reduction (low nox & desulphurization)
- Package units and equipment

Oil & Gas

- Plant debottlenecking
- Boilers and fired heaters incl. fuel supply systems
- Process units for oil & gas treatment
- Water treatment plants (chlorination & demineralisation)
- Pressure vessels & reactors (NBIC/ASME)
- Steam turbines and other rotating equipment
- Steam & process pipe systems
- Plant shut down service

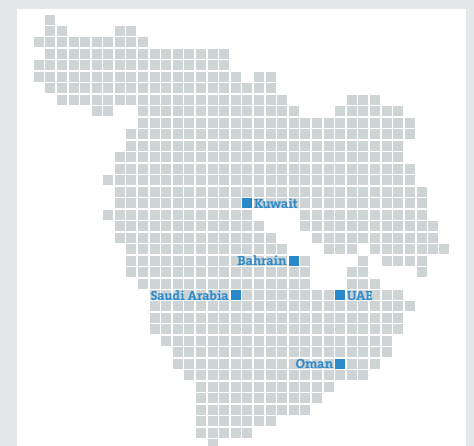

Desalination

- Debottlenecking of distillation process
- Improved brine recycle flow (Bilfinger Deutsche Babcock Middle East patent)
- Steam recirculation system (Bilfinger Deutsche Babcock Middle East patent)
- Evaporator & vacuum systems
- Plant piping of sea water, brine & distillate
- Instrument & control systems
- Turbines & other rotating equipment

Portfolio

- Project Management
- Feasibility Studies
- Basic Engineering and Technical Studies
- Detailed Engineering
- Procurement
- Construction, Installation and Commissioning
- Spare Parts Service
